EMBURSE GO

The all-in-one travel companion app
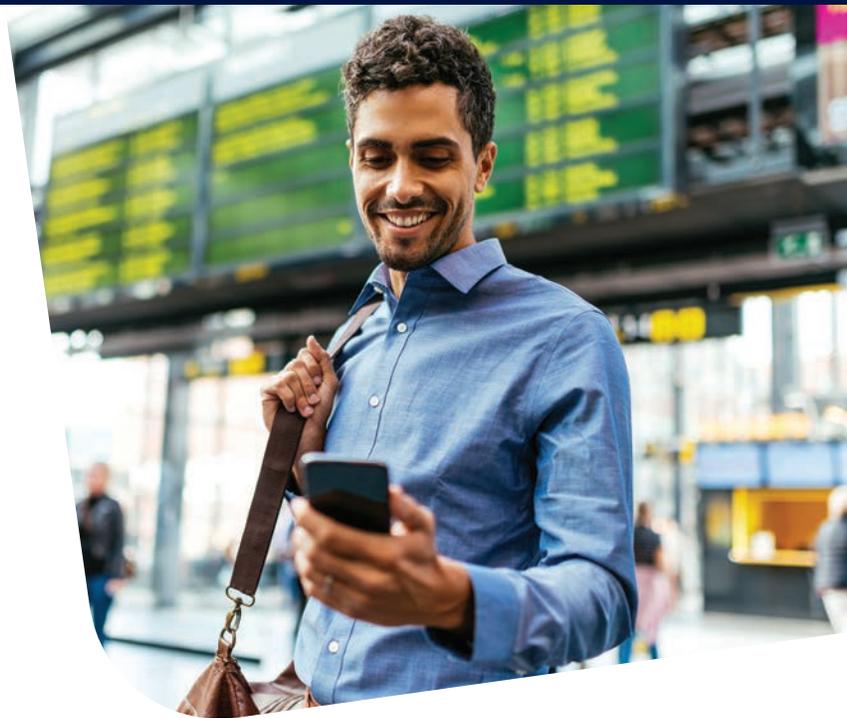

When your employees are on the go, they need a mobile travel companion that makes their lives easier and helps guide them. Juggling multiple travel apps to manually piece together their itinerary is time consuming and lowers productivity.

Emburse Go gathers all of your travelers reservations into a user-friendly companion app to create one single itinerary. It helps in pre-trip planning with useful destination information including health and safety requirements and manages on-trip events such as restaurant, air, hotel reservations and ground transport options. Instant access to flight alerts and local city guides as well as corporate travel benefits and policy information keeps employees engaged and focused on business outcomes.

SIMPLIFY USER EXPERIENCE

Integrate all your suppliers into one single platform to streamline your travel program.

INCREASE COMPLIANCE

Powerful in app messaging enables you to share travel policy information and contextual on trip information to encourage program adoption.

BOOST PRODUCTIVITY

When travelers feel informed, safe, and supported, they can focus on the big meeting—not how they're getting there.

Drive more value from every trip

Emburse Go syncs with all of your suppliers including OBT and TMC to streamline your processes and minimize friction moving between apps to manage pre and on trip events.

After booking a trip, all upcoming travel details load directly into the app by PNR feed, emailing itineraries, or inputting manually. The messaging center displays relevant information such as city guides, office locations, visa, and health requirements to help travelers plan ahead.

Notifications nudge employees to adhere to policies (like booking windows and selecting preferred vendors) to maximize travel ROI. Destination specific tips like local music, restaurants and wellness activities keep them engaged and delighted.
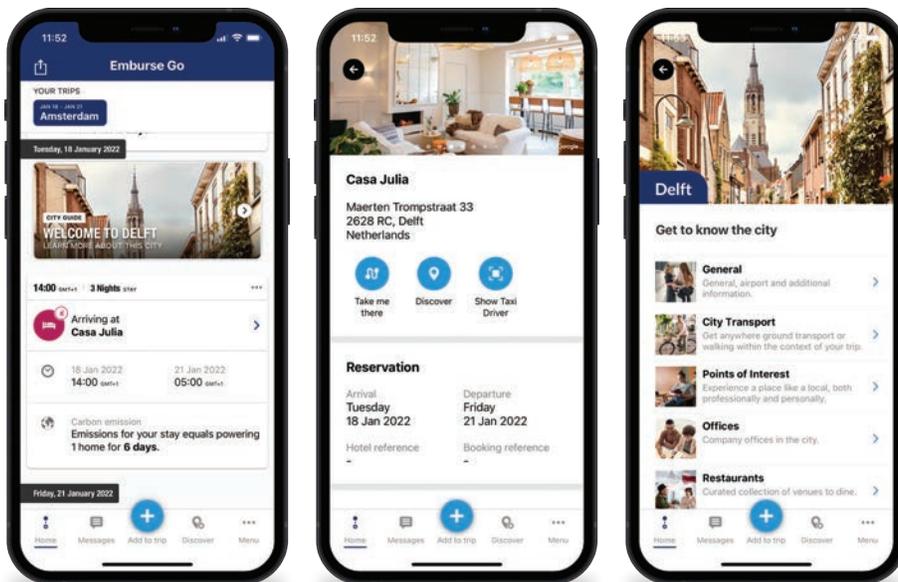

Tailored solutions that grow with you

MAXIMIZE SAVINGS
Make it easy for travelers to book with preferred suppliers with negotiated rates and leverage rebates with program partners like credit card or restaurants.

UTILIZE BEHAVIORAL DATA
Leverage and collect trip data to impact travel program goals like adoption, leakage and sustainability.

GLOBAL-READY SOLUTIONS
Multi-language support and features like show taxi driver let you share drop off information in your destination country's native language.
