CASE STUDY

VoteRiders

Reduced receipt submission lag and volunteer reimbursements with Emburse Spend

Before partnering with Emburse, VoteRiders had a completely manual expense management process that relied on both employees and volunteers submitting spreadsheets with expense information and receipt images.

This process was not only difficult to manage and track for financial audits, but also placed an undue burden on staff and volunteers waiting for out-of-pocket reimbursements. Shane Epps, Operations Manager at VoteRiders, selected Emburse Spend to replace the manual expense management process, make receipt capture and submission simple, and broaden access to organizational funds without losing control.

⚠ Challenges	✔ Results
• Time-consuming employee and volunteer expense management • Inefficient process of cutting checks for payments • Security issues with stolen cards	• Saved finance 20 hours per month • Achieved ROI within 3 months • Drastically reduced receipt submission lag • Eliminated manual expense management process

User-friendly solution achieved ROI within three months

VoteRiders was impressed with the personal attention they received during their Emburse Spend implementation, which enabled them to quickly adopt and utilize the software. Emburse Spend's mobile app made it simple for users to capture and submit receipts with every transaction, and system-built rules automatically enforced policy compliance.

Finance began paying expenses via virtual card, greatly reducing the amount of checks that needed to be processed and increasing payment security. As a result, they saved 20 hours per month. With access to virtual cards, volunteers no longer relied on submitting personal expenses for reimbursement, increasing the likelihood that they would start and continue helping the organization.

About Emburse

Emburse makes expense management simple. We deliver efficiency and time savings, increase financial visibility, enhance spend control and compliance, and improve the business travel experience.
